

What is ZashPaySM?

ZashPay is a new personal payments service that enables you to send and receive money to those you know – securely and electronically – as part of InsurBanc’s Bill Pay system. All you need is their email address or mobile phone number!

When you use ZashPay to send money to someone you eliminate the hassle of making an ATM run or writing and mailing a check. And because you’re paying directly from your bank account to theirs, it takes as little as one business day for users of ZashPay to receive their money. It’s that easy!

How it Works

If you are already an Online Banking Bill Pay user:

1. Log on to Online Banking
2. Click the “Pay People” tab within Online Bill Pay
3. Enter the person’s e-mail address or mobile phone number and the amount to pay.

If you are not a Bill Pay user, click on the Bill Pay tab in Online Banking to register.

If the recipient’s financial institution participates in the ZashPay program, they can receive their money from within their online banking bill pay system. If their financial institution does not belong, the recipient can accept the funds by simply registering at ZashPay.com.
